with 3 extensions per side (t)

2 Extension bars (k)

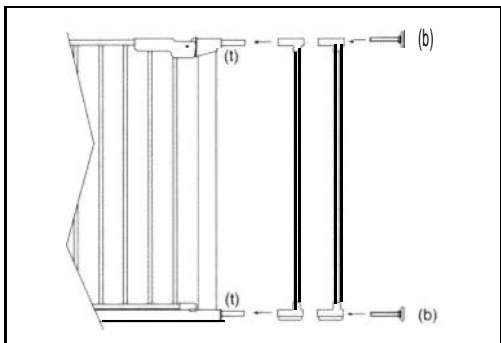

Assembly

Extensions must be added as shown.

Extension Placement Guide

| | | |
|-----------------|---------------------|--------------------------------|
| 29 1/4"-34 7/8" | Gate + 1 extension | - may be placed on either end |
| 34 1/2"-37 1/2" | Gate + 2 extensions | - one on each end |
| 37 1/4"-40 1/4" | Gate + 3 extensions | - 2 on one end, 1 on other end |
| 39 7/8"-42 3/4" | Gate + 4 extensions | - 3 on one end, 1 on other end |
| 42 5/8"-45 5/8" | Gate + 5 extensions | - 3 on one end, 2 on other end |
| 45 1/2"-48 1/8" | Gate + 6 extensions | - 3 on each end |

Each end may have no more than 3 extensions.

Housings, bars and square extensions (5 1/8") from Basic Center Gateway Set may be needed.

Depending on how many extensions are being added, insert appropriate square **extension** tubes into gate ends. Connect the **bar to one** upper extension housing and one lower extension housing. Push assembly over extension tubes. There should be no metal showing from extension tubes. It may be necessary to apply pressure to tubes to **ensure they** are fully inserted into gate ends. **Slide** spindles into extension tubes.

See Center Gateway@ user guide to complete installation.
